UI/UX, PRODUCT, CREATIVE

Portfolio: [www.designarea.co.il/eng](http://www.designarea.co.il/eng)

I have been living and breathing design since the age of 15, while continually learning and enriching the knowledge for two decades. During my career, I have touched almost all aspects of design, participated in special projects in various themes, and have acquired exceptional knowledge. For the past 13 years, I have been focusing on UI/UX.

**Personal qualities:** creativity, responsibility, attention to small details, ability to lead, high and fast learning abilities, excellent interpersonal skills and teamwork.

English

## HOBBIES

Dance Travel Photography Sculpture

## EXPERIENCE \*PLEASE KEEP THIS CONFIDENTIAL

2019-Today

**HEAD OF UI/UX & CREATIVE** at [www.ElephantStock.com](http://www.ElephantStock.com) - an American tech-Innovative company in the home decor industry (e-commerce, 80k+ art items & personalized products). In my role, I have established an in-house Design Studio including 3 designers, freelancers, a video creator. As the head of the design studio, I am a part of the management of the Product and Marketing departments.

Daily collaboration with product managers, R&D, SEO, and marketing team. **Creating a data-driven design based on:** researchers, a/b tests, polls, user usability tests, SEO data. Creating complex product design flows (mobile & desktop), as well as a mobile app for personalized products. Leading unique projects from ideation to realization, creative strategy for marketing campaigns and events (social, display, video ads' CTR) using data, code, motion, and 3d. Full company rebranding. Creating a complex email marketing system, design system, brand book.

Thanks to our collaboration with the product department, we increase events rates per session, page views, and the rate of different conversions goals (like product details CTR, add to cart, checkout, purchase rates). **During 3 years of all departments collab, the companies annual revenue tripped and grew from 30 employees to 200.**

2018-2008

**UI/UX | PRODUCT DESIGN** - Niloos Software - innovate hunter edge recruitment system. Have participated in the development of complex systems b2b, b2c based on cloud computing (SaaS), applications for mobile devices, and digital products. Collaborated with product managers, engineers, and developers as a product designer. Used various data to create a perfect user experience.

I acquired knowledge of HTML/CSS and the development process for different environments which allows me to better communicate with developers, giving them clear instructions and finding creative solutions to problems that arise during development.

2003-2019

**BRANDING, DIGITAL DESIGN** / self-employed / - Accompanied large clients (startups, medical centers, municipalities, sports centers, retail companies) in branding and various marketing digital and print products. Designer for large exhibitions, shelf products.
